

Why WOULDN'T You Deploy Cormant-CS DCIM???

Too expensive

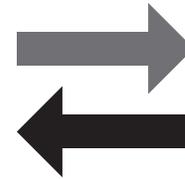

Too complex

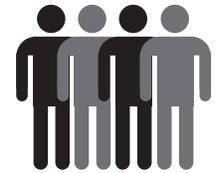

Too time consuming

Too many features to license

Our systems won't integrate seamlessly

It will require staff to administrate

Cormant-CS **Cormant-CS** Cormant-CS

Most customers reach positive ROI in

1

Year

We have the most cost-effective solution. We've seen customers save over \$200,000 per year.

78%

Of our customers expanded deployment

94%

Of our customers renewed contracts

We have the most user-friendly software in the industry; just ask our customers!!

Up to **92%** time saved vs using spreadsheets

On average, we deploy and audit a 500 rack facility in 30 days.

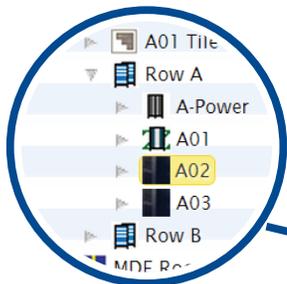

Simple, flat licensing model scaled to what you need with no user seats to buy.

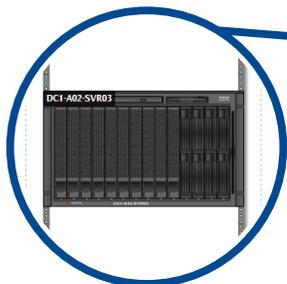

Fully configurable! We can integrate with any system.

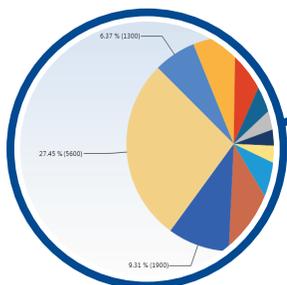

Most companies use existing staff and sometimes even fewer.

Visualization:
Dynamic rack views, plan views and full channel connections including capacity, trend, efficiency and environmental data.

Configurability:
Uniquely configurable to fit your company's needs and record exactly the data required. Allows for scalability so it can grow with your company as it expands.

Dashboards:
Dashboards display real-time reports enabling effective planning, reporting and decision-making.

Power Actual
Value: 7720
Max: 10000

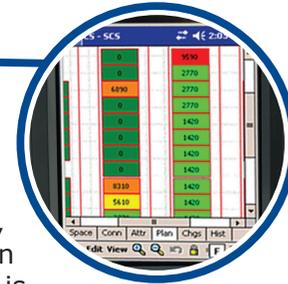

Power Plate
Value: 2800
Max: 10000

Temperature Back
Value: 0

Monitoring and reporting of power, cooling, data connectivity and overall device resources.

User-Friendly:
User-friendly software with a holistic view of your data center & beyond to increase staff efficiencies and take a proactive approach to recognizing problems before they occur.

Mobility:
Ensure changes are recorded as they're made, providing up-to-date, accurate data you can trust. Off-line access is also available for synchronization.

CEO Paul Goodison speaking on "Ensuring a Successful DCIM Project. What You Need to Know." on Thursday, April 3, 2014 at 1:00PM.
