Cormant-CS Data Center Infrastructure Management (DCIM)

VISIBILITY

Dynamic rack views, plan views and full channel connections including capacity, trend, efficiency and environmental data. Scales to tens of thousands of racks, as needed.
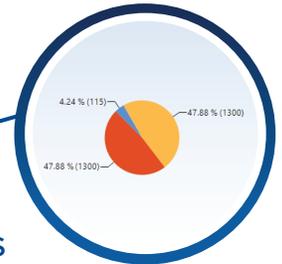

MONITORING

Monitors and optimizes power, cooling, data connectivity and overall device resources. Enables proactive management to alert users before problems occur.

CONFIGURABILITY

The autonomy to configure and advance functionality based on the organization's specifications without requiring Cormant assistance. With an Open Framework philosophy, open API and full scripting, attributes, templates, analytics and more are configurable.

ANALYTICS

Real-time reports and analytics enable effective planning, reporting and decision-making.

The Cormant-CS Difference

MOBILITY

Monitors and optimizes power, cooling, data connectivity and overall device resources. Enables proactive management to alert users before problems occur.

CONNECTIVITY

Quickly and easily document end-to-end power and data connections in data centers and campuses.

Experienced

Cormant-CS, launched in 2003, was the first infrastructure management software solution for data centers (DCIM) and campuses (DCIM And Beyond).

Trusted Experts

Every member of the Cormant team is a DCIM product expert. The software has been success-fully implemented in nearly every type of industry and boasts a 94% customer retention rate.

Global Support

Cormant's world class 24/7 support team provides prompt and thorough assistance with follow up to ensure satisfaction for customers in any part of the world.

Simple UI

The most intuitive user interface in the industry, including seamless functionality across all platforms, plain English labels, customer-specific naming and more.

Contact Us for more information or a demonstration of one of the most widely-adopted, complete DCIM solutions in the world.
