

CORMANT-CS9

New Features Training 9.0 & 9.1

January 2018 v006

Topics Covered

- Summary of Key Changes
- Training on New Features v9.0/v9.1
- Information & Other Training Resources
- ✓ <u>Online Help Feature</u>
- ✓ <u>Stay in Touch</u>
- <u>Cormant Customer Support</u>

Summary of Key Changes

v9.0.0

- > Asset Tree improved and completely removed from Cormant-CS Client
- Cormant CS-Web Asset Tree Functionality Enhanced to include a drag and drop Connections feature
- > Plan removed from the Client and now improved and fully on the Web
- Floor Plan Widget available on the Web Dashboard.

v9.1.0

- Reporting: Continued migration & enhancement of features from the Client to the Web to include Editing & Running of Reports, Scheduling Reports, and Historical Report Configuration.
- > User Security: All Admin, Roles, Zones, Permissions and User Account Management has also relocated to the Web.
- Report Caching Services feature has been added to the Web for faster loading of reports and Dashboard widgets

Other Significant Changes (V9.1)

- Search improved with a full set of all attributes, previously some system attributes were hidden.
- Basic license details are now provided on the login screen to assure you are aware of the license in use.
- Cable and Port attribute editing is now provided as part of a right-click on any component in Connections view.
- > Reports space-path data is now import ready.
- > Zone permissions now inherit from parent if not explicitly defined.
- > Improvements to support long rack names on plan view to show most significant digits.
- > Enhanced `when-modified' rack script execution
 - Scripting has been enhanced to support a special 'when-modified' script type that will trigger if anything in a rack is changed.
 - > This provides always-accurate rack data with very low system overhead.
 - > We recommend current scripts are changed in consultation with your Cormant-CS consultant.

Training on New Features

Let's Get Started...

Asset Tree Improvements (V9.0)

> The Client Asset tree view has been removed from the Client and is now included on the Web with all client right click options supported.

Web Asset Tree Functionality Enhanced (V9.0)

 Drag and Drop functionality is now supported for **Connections** with an enhanced connections module. Herein, select the port you wish to make the connection to by a left click {hold}, drag and drop onto the desired component you wish to connect to. *Similar process as in old Client.*

Cormant CS-Web Plan View Module (V9.0)

> A new Plan View module and related editing tools are now available on the Web with ability for plan view uploading and edit display features. Click EDIT to begin.

Cormant CS-Web Plan View Module (V9.0)

> Once EDIT has been activated, you will notice the tree changes color and highlighted assets (in yellow) now represent unpositioned objects. Click Unlock to select the type of component you wish to unlock and edit. Note: Not all components need to be added to the plan. This keeps Plan View relevant.

RIGHT CLICK OPTIONS

Cormant CS-Web Plan View Module (V9.0)

- You can now resize the selected object. You can also select multiple objects by holding Ctrl and clicking on additional objects.
- > Ctrl +Z = UNDO Ctrl + Y = REDO

Floor Plan Widget (V9.0)

- > The **Floor Plan Widget** has been added to the Dashboard.
- > Go to Dashboard. Click on Add Widget and Add the Floor Plan Widget
- > Set your parameters, then click Save

Add Widget		×			
			Floor Plan		1
	Historical Report Displays a historical report as a line chart.	Add	Component Coloring	02-Atlanta-DC1 CMDB My Alerts	•••
			Text	Rack Name	•
	Custom Report Displays a custom report as a bar chart.	Add	Grid Pixel Spacing (cm)	 Show Grid 100 Show 3D 	
			Refresh Interval	5	
	Floor Plan Displays a floor plan of a space in 2D or 3D.	Add		Automatically refresh every 5 minutes Save	Cancel

Floor Plan Widget (V9.0)

- > The **Floor Plan Widget** will now display on your Dashboard.
- > To obtain desired view:

- > Wheel Mouse = Zoom In/Out
- Left Click Hold = Side to Side and Up and Down
- > Right Click Hold = Pan/Tilt

Reporting (V9.1)

NOTE: Report editing has been moved from the Client to the Web. All existing reports will be migrated to the Web and all functionality has been maintained to include any reports used for a dashboard.

> To access Reports on Cormant-CS Web:

You will now find a list of Reports, including Standard Reports, Custom Reports, Scheduled Reports and Historical Reports in tree format on the left hand side.

**Historical attribute capture is still on the Client in this release.

Reporting (V9.1)

> Notice when you click on any report, that the editing options are all listed on one screen as a single snapshot of a report.

- Export data options are available based on Report Types.
- > Under Report Type dropdown,
 - > Select Normal Report option for PDF, XLS & CSV formats
 - > Select **Simple Report** option for an unformatted CSV style
- > Then Click **Save**, **Run** Report and Choose **Export** format

User Management (V9.1)

- > All Admin Users, Roles, Zones, & Permissions have been removed from the Client and relocated to the Web. All existing users, roles, zones and permissions will fully migrate to the Web and no further action is required after upgrade.
- > To Access Admin on Cormant-CS Web:

From the dropdown set of option you can navigate to User Management,

> **Users & Roles** are now configured with three tabs of functionality on one screen:

🗆 Roles	Administrator Role	
Administrator		
Customer	Details Users Permissions	
Engineer	☑ Edit Save X Cancel + Add Role	
HelpDesk	Role Details	
	Name Administrator	
	Description	
		/
	Role Default Site DC Building	*
	Role Default Queue	•

▷ DETAILS tab → Click on the Role on far left hand side (in this example we have selected Engineer Role) to show the DETAILS default landing tab that offers basic Roles details and also enables the user to configure a new role by clicking Add Role if their profile settings allows permission.

User Management: Zones (V9.1)

Select a specific yellow highlighted zone from the Zone Tree to display the related permissions for that Zone. In the below example, the Atlanta DC zone has been selected.

Zone Tree	Atlanta DC Building Zone						
🖃 🌒 All Spaces							
🕀 🔴 Asia/Pacific	Details						
🕀 🔴 Europe	🕼 Edit 🖺 Save 🗙 Cancel 🕇 Add Zone 🗎 Delete	8					
🖃 🌖 North America	Zone Permissions						
Canada	Role	Components	Audit				
😑 🗮 USA	Administrator	Eull Cases	E.ull .				
🖃 🛔 Atlanta DC Building		Full spaces	ruii *				
🕀 🧍 02-Floor	Customer	View	None				
🕀 🧍 11-Floor	Customer - ACME Inc						
	Customer Acide inc	None	None				
	Engineer	Full Component 🔻	Full				
	Helpdesk	View	None				

If you select a space not highlighted in yellow, then you will receive a message indicating "Zone Permissions Not Registered", and you may create a zone by clicking Add Zone.

User Management: Personal Security (V9.1)

- Attention Administrators! There are 2 new options that can be controlled at the user level regarding user account preferences. This is managed at the User profile level (however this can also be initially set by the administrator when the user profile is being created under the USER tab)
 - > A user can select their own default home page upon login (for example, perhaps a user prefers their home page to be the Assets tab versus the Dashboard.
 - > A user can also select the specific space to start from the asset tab for easier navigation to the asset tree and bypassing the initial search screen.

🔒 Irina Astrom

Change User Profile Settings *4* About Help Log Out To manage these user preferences, a user should login as themselves, then click their account icon on the far top right of the system screen. From the dropdown menu,

User Preferences

select Change User Profile Settings

> Under User Preferences, they can now select their default Home Page and Starting Assets Space.

*Please note only spaces the user has permissions to view will be available for selection in the drop down menus

Home Page:	Dashboard	v
Starting Assets Space:	All Spaces	
Default Workflow Site:	DC Building	Ŧ
Default Workflow Queue:	All Sites	Ŧ
Default Dashboard:	Default Dashboard	Ŧ

Report Caching for Faster Reports (V9.1)

- The Report Caching Service has been designed in response to customer feedback to speed up the loading time for reports on the Dashboard as well as complex reports being run that generally have had a slow(er) run time. It is possible to enable/disable this feature, either globally or per individual report.
- > To Access The Report Caching feature on Cormant-CS Web:

Report Caching for Faster Reports (V9.1)

- Report caching is designed to only cache report(s) that are being run regularly and will keep caching those reports based on the configurations set, as shown below.
- > To activate the configuration options for report cache services, click EDIT, configure settings, then click Save

run?

Report Caching for Faster Reports (V9.1)

- > As an Administrator, it is useful to view all reports being cached, as shown below.
- You may *elect to stop the cache* from running on individual reports. This is useful if a specific report is very complex or caching is no longer required. To do this, select the report(s), then click **Delete Selected Caches**.

Reporting									
(Caching

	Enabled 🖉				Refresh Interval	30	30		
Expiration 7			Days]					
	Report	Role	Last Access Date		Last Cached Date		Cache Size	Error	
	All DC Total RU	Administra	04/12/2017 13:37:07		04/12/2017 23:53:32		1.21 KB		
	All DC Total BTU Administra		12/2017 13:37:10		05/12/2017 01:57:35		1.20 KB		
	All DC Power Actual	Administrator			05/12/2017 01:57:35		1.22 KB		
	☑ 100 Base TX Summary by Rack	Administrator	Report is cached based on what		05/12/2017 01:57:52		10.76 KB		
	TP Link Current Packets	Administrator	ROLE is running it.		01/11/2017 11:43:38		1.81 KB		
	Peripheral Equipment Administrator 25/10/2017 12:02:51			01/11/2017 11:58:38		1.80 KB			

NOTE: When report cache is enabled, you can still hit refresh on a single report or the Dashboard widget to override the cache and get real time data.

Departing

Information & Other Training Resources

> Release Notes 9.0 & 9.1 can be found in the release package on the <u>Cormant website</u>, using your secure user login credentials on the the Customer Portal.

Online Help

- > Our Help System has migrated to Cormant CS-Web, our web based platform (though also still available on Cormant CS-Client).
- > To access the Online Help feature:
 - > In the Web, click on your UserName in the Top Right Corner
 - > From the dropdown menu, click Help

> You will be welcomed to the Cormant Help Feature in a new tab!

CORMANT

Online Help

> Online Help is divided into 5 major sections

- > What's New in Cormant CS-9?
- > Using the Web
- > Using the Handheld
- > Using the Desktop
- > Installation & Troubleshooting
- > You may expand any section by clicking on the associated icon

The Search feature in the upper right hand corner will allow for key word searching and quickly finding the information you need.

Stay in Touch

To access the *Private* Cormant-CS user group: <u>https://www.linkedin.com/groups/4323060</u> or email <u>sales@Cormant.biz</u> to join.

For Additional Help

If you would like additional help with any aspect of Cormant-CS, contact your partner or Cormant directly at <u>support@Cormant.biz</u>
