# Announcing Cormant-CS Version 11

With the release of a brand-new Android application, Cormant's leadership in online and offline mobility continues. Cormant-CS 11 makes offline access to asset and connectivity data fully mobile on any Android device. The Windows Mobile application is still supported in this release.

Taking feedback from many customers, Cormant-CS 11 includes a totally re-written history module, including far more detail of each change, grouped changes, and hyperlinks to provide the context of a change.

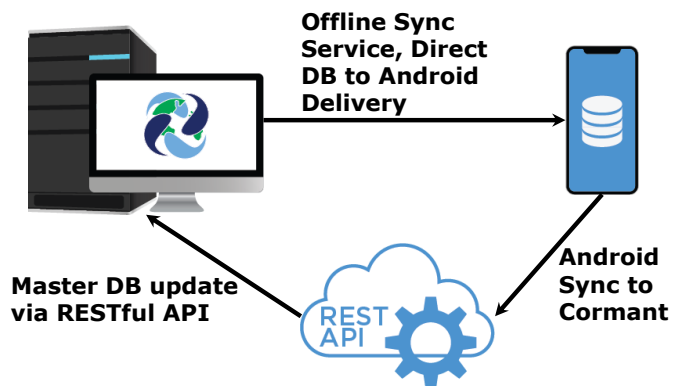

## Entirely New Asset History Logging and UI

- Completely new historical data logging.

- Grouping of related changes, with summary record.

- New right-hand panel to show more details about the recorded change.

- Additional filter criteria to see exactly the required data.

- All component details are active left and right clickable to further understand and analyze a change.

- Legacy history is displayed in the new format.

Android Offline

- Android application, with new, Cormant developed synchronization.

- Designed for customers who do not have access to wi-fi or 4G server connectivity.

- Stateless synchronization to decouple from Cormant-CS server changes.

- New sync service part of Cormant-CS, runs as part of Cormant-CS or standalone. No longer dependent on SQL version or technology.

- Simple initial set-up, get it working 30 mins.

Offline Sync Service, Direct DB to Android Delivery

Master DB update via RESTful API

Android Sync to Cormant

Android Offline Management; profiles, logging, conflicts.

- New user/role management screen to define sync profiles.

- Role based, multiple profiles per-role.

- Each profile is defined to sync data from a location in the Cormant-CS space tree.

- All Sync to and from Android logged using a unique transaction ID for full Audit.

- Where a sync conflict occurs, typically if two users change the same data, conflicts are logged on a new asset tab.

WITH CORMANT, BUSINESS IS PERSONAL

Role Based Asset Tab Security/Visibility

- The quantity of tabs in the Asset screen have increased as new capabilities are added to Cormant-CS. Not all tabs are relevant to all roles.

- Role security and configuration now includes the ability to show/hide each tab. Providing a cleaner UI to users.

Other Version 11 Functionality

The Windows Mobile Pocket PC platform is still supported in version 11.0. There is a new handheld application that will be required as part of 11.0 deployment. 11.0 is designed as a transition release supporting both the legacy Pocket PC platform and the modern Android offline application. Application support for the Pocket PC will be dropped in a future release. We encourage offline customers to consider migration.

Version 11 includes an enhanced RESTful API. Documentation for the API is online within the application and presented as Swagger documentation.

Enhanced alerts are included as part of version 11, supporting alert delays and additional external API configuration.

Browser, Operating System and SQL Support

Cormant-CS supports all versions of Microsoft Server from 2012, onwards.

Cormant-CS supports all versions of Microsoft SQL from 2012 SP3, onwards. The Android offline application works with any version of MS SQL.

Browser support includes the latest versions of Edge, Chrome, Firefox on PC, Apple, Android & iOS mobile devices, (Safari/Mac also supported).

The Android offline application supports Android 7 and above.

Where to Look for More Resources

The customer/partner web portal has a section dedicated to version 11 resources, including training, recorded web sessions and documentation. (email support@cormant.biz if you don't have a login)

The release notes supplied as part of 11 are supplemented by a full separate guide to Android offline configuration and use.

The Cormant-CS online help has been updated for version 11.

Please download the latest Cormant-CS release at portal.cormant.com. If Cormant or one of our global partners can assist with additional professional services as part of upgrade or expansion, please contact us. Finally, don't forget we have a private Linked-In group for all customers, ask Cormant support for an invitation today and join the conversation.
